

(as of 5 Aug 2009)

Removal of Barriers to Biomass Power Generation and Co-generation in Thailand

Project Description	The project is aimed at reducing Green House Gas emissions by accelerating the growth of biomass power generation to replace current fossil fuel consumption in Thailand. A one-stop biomass clearing house and two pilot power plants have been established for biomass power generation demonstration.
Project Document ID 14921	The project is related to <u>Outcome 1</u> in the Country Programme Action Plan: Efficient community network in sustainable use of local natural resources and energy with engagement in policy and decision making processes. For the full project document, please go to http://www.undp.or.th/resources/cpandpd.html
Corporate thematic area	Environment and energy
Status of the project	On going
Location	Biomass Clearing House Mechanism in Bangkok. Two demonstration plants in Roi-Et province (Northeast) and Yala province (South), Thailand
Period of the project	2001- March 2009
Name of UNDP Programme Officer	Ms Phansiri Winichagoon
Partners on the ground	Energy for Environment Foundation (E for E)
Major sources of financing	Global Environment Facility (GEF): USD 6,805,000
Delivery in previous fiscal years	93% (as of Aug 2009)
Interim results and evaluation reports	N/A (Available for closed projects only)
Additional available information	Please visit the Energy for Environment Foundation website at www.efe.or.th
