Enhancing Thailand's Policy Advocacy and New Initiatives on Climate Change

Project Description	The project aims to respond to the government's need to activate its national climate change strategies through policy studies, dialogues for new climate initiatives, and public campaigns on climate change mitigation and adaptation. It also enhances Thailand's access to the carbon finance market through the MDG Carbon Facility and strengthens programme monitoring mechanism of Thailand's national focal points on GEF, Climate Change, and Biological Diversity.
Project Document	The project is related to Outcome 2 in the Country Programme Action Plan: Increased capacity of national focal points in addressing policy and removal of barriers in pursuing local sustainable management of natural resources and environment in selected ecosystems and promotion of area-based renewable energy application.
