Promoting Renewable Energy in Mae Hong Son Province

Project Description	The project aims to overcome barriers to sustainable and widespread provision of Renewable Energy (RE) services by integrating the policy at the level of provincial planning. The project activities will be piloted in Mae Hong Son to provide a model for nation-wide up scaling and replication.
Project Document	The project is related to Outcome 2 in the Country Programme Action Plan: Increased capacity of national focal points in addressing policy and removal of barriers in pursuing local sustainable management of natural resources.
